ABOUT US

At Hygro Impex, we are dedicated to delivering premium-quality, eco-friendly coco coir products that promote sustainable gardening and horticulture. With a strong commitment to innovation and environmental responsibility, we strive to provide growers with natural, chemical-free solutions that enhance plant growth while preserving the planet. Our product range includes Coir Peat Blocks, Coir Pith, and Gro-Coir Grow Bags, carefully crafted to meet the diverse needs of modern agriculture. These products are widely used in greenhouses, hydroponic systems, nurseries, and open-field cultivation, offering an organic and sustainable alternative to traditional growing mediums.

WHAT WE DO?

COIR PEAT BLOCK 5KG

We supply Coir Peat 5kg Blocks in two variants – washed and unwashed. Washing controls the EC of the product that is important for root and plant growth. The Coir Peat Blocks are easily breakable. These can hold more than 75-liter water per block and 16,500 liters per pallet. PH of the media is neutral that aids good absorption of nutrients. These have less fungal infections than soil, as well.

BUFFERED COCO PEAT

Buffered Coco Peat is one of the most popular growing mediums used in gardening and horticulture today. As a natural, eco-friendly material, it provides optimal growing conditions for a wide range of plants, from flowers and vegetables to high-value crops

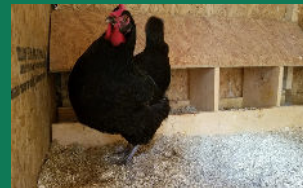

COCO PEAT BRICKS

Coco Peat Bricks are one of the most versatile and sustainable products in the horticultural industry. Made from 100% natural coconut husks, these compressed bricks are designed to provide optimal growing conditions for plants, making them an excellent choice for gardeners, landscapers, and commercial growers alike.

COIR GARDEN ARTICLES

ANIMAL BEDDING

Our Coir Garden Articles include eco-friendly pots, mulch mats, and hanging baskets, designed to enhance plant health while reducing environmental impact. These biodegradable products provide a sustainable alternative for home and commercial gardening. Hygro Impex offers high-quality coir-based animal bedding that ensures a comfortable, clean, and dry environment for your animals. Made from 100% natural coconut husks, our bedding is absorbent, odor-controlling, and dust-free—making it ideal for horses, poultry, small pets, and livestock.

GROW BAG

Gro-Coir Coco Grow Bags are filled with coarse/fine grade coco peat, ideal for growing vegetables, soft fruits and cut flowers in Greenhouse or Poly House Tunnels. We offer Gro-Coir Coco Grow Bags in different formats, sizes, and blends for use by professional growers in greenhouses & hydroponic systems.
